

ΟΛΥΜΠΙΑ ΔΩΜΑΤΑ
OR AN

ALMANACK

for the Year of our

LORD GOD

1703.

(14)

Being 3^d after the Bissextile or Leap-year,
and from the Worlds Creation, 3652.

Wherein is contained the Lunations, Conjunctions and Aspects of the Planets, the Increase, decrease and length of the day and night, with the rising, Southing and setting of the Planets, and Fixed Stars throughout the Year, whereby may be known the exact hour of the night at all times, when either the Moon or Stars are seen.

Calculated according to Art and referred to the Horizon of the ancient and renowned Burrough-Town of *Stamford*, whose Longitude is 14 deg. and Latitude 52 deg. 41 minutes, sitting all the middle Counties of ENGLAND, and without sensible error the whole Kingdom.

By JOHN WING, Mathematic.

CAMBRIDGE,

Printed by John Hayes, Printer to the
University, 1703.

Wing 1703.

The Terms and their returns this Year.

Hilary Term begins	Octab. Hilary	January	20
January 23, and ends	Quind. Hilary	January	27
February 12, and hath 4	Craft. Purif.	February	3
returns, viz.	Octab. Purif.	February	10
	Quind. Pasch	April	18
Easter Term begins	Tres Pasch.	April	19
April 14, and ends May	Mens. Pasch.	April	26
10, and hath 5 returns	Quinqs. Pasch	May	3
	Craft. Ascen.	May	7
	Craft. Trin.	May	24
Trinity Term begins	Octab. Trin	May	31
May 28, and ends June	Quind. Trin.	June	7
16, and hath 4 returns	Tres. Trin.	June	14
	Tres. Mich.	October	20
Michaelmas Term be-	Mens. Mich.	October	27
gins October 23, and	Craft. Anim.	November	3
ends November 29, and	Craft. Mart.	November	12
hath 6 returns.	Octab. Mart.	November	18
	Quind. Mart.	November	25

Good are the Laws if they be right apply'd,
But from them often Lawyers step aside.

Bright Venus is our Morning Star till January the 22 day, from
thence to the 5th. of Novem. she is our Evening star, from thence
to the Years end she shines in the Morning.

This Table shews the Interest of any sum of Money from 1 s. to 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever. And note, that for the greater exactness the peny is divided into a 100 parts; so that 25 parts are a farthing, and 50 parts an half-peny, and 75 parts 3 farthings, &c.

Example :

The Interest of 100 l. for six months one Week and one day, is thus found by the Table.

Interest of 100 l. { for 6 mon. 03-0-0-00 } viz. 3-2-7 half-peny
 { for 1 week, 00-2-3-61 }
 { for a day, 00-0-3-94 }
 03-2-7-55

Wing 1703.

A Regal Table in a more exact manner.

This Year, Month, and Day, (accounting the Year to begin Jan. 1.) whereon every King and Queen of Eng. since the Conquest began their reign.			The number of Years, Months, and Days, that every K. and Q. reigned 28 da. to a month.			The num. of Y expired in this Y. since they began to reign: as also since they ended.

Queen Anne	1702	March 8	long to Reign.						

Here Gods Vicegerents do in order stand
And how successively each Rul'd the Land;
May we not want a Monarch great indeed
Wise, good, and gracious, mercifull in need:
For such a one may all good Christians stand
Both now and always for to Rule this Land.

England beware, Foxes will use their Tails,
 Whereby some things unhappily prevails.

Day 9 hours and a half long.

Seven Stars south 40 min. past 5 at night, and
 sets 33 min. past 1 in the morn.

Venus sets 33 min. past 5 at night.

Day 10 hours long.

Lyons Heart south 36 min. past 11 at night,
 and sets 50 min. past 6 in the morn.

Mars sets 40 min. past 10 at night.

Day 10 hours and an half long.

Jupiter sets 47 min. past 8 at night.

Great Dog Star south 46 min. past 7 at night,
 and sets 17 min. after midnight.

Day 11 hours long.

Jupiter sets 34 min. past 8 at night.

Mars from Aries hath remov'd his station,

Where th' other two Superiours have relation.

There's something in't which ere long will appear,

And looks as tho' the thing would prove severe.

March hath xxxi days.

- New moon the 6 day, 47 min. past 1 afternoon.
- First quarter the 14 day, 3 min. past 3 afternoon.
- Full moon the 22 day, 43 m. past 1 in the morn.
- Last quarter the 28 day, 3 min. past 6 at night.

To find the true Hour of the Day by the former Table.

Take a Staff of what length you please, and with a pair of Compasses divide it into ten equal parts marking upon the Staff, then in some level place where the dark shade, let it upright, and mark where the end of the shadow falls, which done measure with your hand the length of the shadow, and note the part it contains, and find out in this Table what against the day of the month, and over head you will find the true hour the day &c. will appear more clearly by example.

Suppose the 9 of April or 13 of August I should find the shadow of the Staff to be 4 parts and a quarter of an inch, then in this Table length and a quarter of an inch, therefore looking in the Table, against the said 9 of April 90, which is 10 parts and a quarter, and the shadow which is then cast, 7 1/2 clock is the true time, or 7 1/2 hours, so that if you observe the sun to be in the meridian at 11, then it is the shadow of 4 parts.

Then the 12 of February, or 2 of October, if the shadow of the Staff be 10 parts, then it is 12 clock, if it be 11 parts, then it is 11 clock, and so the shadow will be more or less different.

Thus you see the last of the Day is easily and finally found, by a Staff or Rod, and the use of this Table, which is so plain and so easy, that anyone may use it, and find the true hour of the Day, by the shadow of the Staff, which is the true hour of the Day.

17: Juan Jaramila, Editor of the San Ysidro News, asks: "about 3 in the Morning, to be fast only in the love of the Earth."

It is the duty of every citizen to support the Government in its efforts to maintain the integrity of the Nation. The Government is the only authority that can protect the rights of the people and ensure the peace and stability of the country. It is the responsibility of every citizen to obey the laws of the Government and to support its policies. The Government is the only authority that can protect the rights of the people and ensure the peace and stability of the country. It is the responsibility of every citizen to obey the laws of the Government and to support its policies.

The appearance of the virus of Nov. 27 is identical to the **Florida** of Langmuir is calling a **Florida**.

THE POWER OF THE PEOPLE

The Commission is a 12-member body, headed by the President, which
 meets in the White House. It is the only body in the executive branch
 that is not part of the President's cabinet. The Commission is the
 highest authority in the executive branch on matters relating to the
 President's personal and official life. It is the only body in the
 executive branch that is not part of the President's cabinet.

11. On the 13 day of December in the morning,

[The page contains extremely faint, illegible markings and bleed-through from the reverse side.]

May 1701.

The VI Eclipse.

Is a small Eclipse of the Sun, upon the 27th of December, near 3 in the morning, to be seen in the parts of the World from us.

Here follows the Calculation of a Remarkable conjunction of the Two Inferiour Saturns, in the Constellation Sign ♄; according to the Scientific Stellarium.

January 4 day at $\begin{cases} 1 & 55 & \text{M. T.} \\ 1 & 47 & \text{A. T.} \end{cases}$ $\begin{cases} 0 \\ \text{in } 4 & 11 \end{cases}$

At the time whereat the true place of the Sun
